Professional Summary

Full Stack and Backend Software Developer with experience building enterprise web applications, REST APIs, microservices, and cloud-integrated systems using Java, Spring Boot, React, Node.js, and MongoDB. Experienced supporting enterprise financial-sector applications within Agile SDLC and CI/CD deployment environments. Skilled developing scalable backend services, distributed systems integrations, API-driven architectures, and cloud-connected enterprise applications utilizing modern software engineering and deployment practices.

Technical Skills

- Languages: Java, JavaScript, TypeScript, Python, Kotlin
- Backend Development: Spring Boot, REST APIs, Node.js, Express.js, Microservices Architecture
- Frontend Development: React, Angular, HTML5, CSS3, Bootstrap
- Databases: MongoDB, PostgreSQL, MySQL, Oracle, NoSQL Databases
- Cloud & DevOps: Docker, Kubernetes, AWS, GitLab CI/CD, OpenShift
- Messaging & Distributed Systems: Kafka, ActiveMQ
- Development Tools: Git, GitHub, Maven, Gradle, JUnit, Agile SDLC, Jira

Professional Experience

React / Java Developer – Tata Consultancy Services (Clients: State Street, USAA)
January 2022 – October 2023

- Built enterprise CRUD and REST API applications using Java, Spring Boot, React, and Node.js supporting financial-sector environments.
- Developed scalable microservices-based applications utilizing Java 8/11, Kafka, and distributed systems technologies.
- Worked with AWS, Docker, Kubernetes, OpenShift, and CI/CD deployment environments supporting enterprise application operations.
- Supported MongoDB, PostgreSQL, MySQL, and NoSQL database technologies within cloud-connected enterprise applications.
- Collaborated within Agile SDLC environments utilizing Jira, Git, GitHub, and enterprise deployment workflows.
- Assisted with backend API integrations, application troubleshooting, and operational support initiatives across enterprise environments.

- Supported distributed enterprise application environments utilizing Kafka, ActiveMQ, and Spring Boot technologies.

IT Support & Java Developer – SummitWorks

September 2019 – February 2021

- Developed Java web applications utilizing Spring Framework, JDBC, JSP, and REST API integrations.
- Built responsive frontend applications using ReactJS, Node.js, HTML5, CSS3, and JavaScript.
- Created JUnit test cases and supported Agile SDLC development workflows.
- Worked with Maven, Gradle, Apache Tomcat, and enterprise application deployment tooling.
- Assisted with backend troubleshooting, database integrations, and operational application support initiatives.

Projects

Enterprise Full Stack Application

GitHub: github.com/dragpk247/CS465-Full-Stack

- Built full stack enterprise web applications utilizing Angular, Express.js, Node.js, and MongoDB.
- Implemented JWT authentication, REST APIs, CRUD functionality, and protected administrative routes.
- Developed backend API integrations and cloud-connected application workflows utilizing modern web technologies.

OpenGL Graphics & Visualization Project

- Developed 3D graphics applications utilizing C++, OpenGL, shaders, and object transformation techniques. Implemented lighting systems, rendering logic, and scene management within interactive graphics environments.

Education

Bachelor of Science in Computer Science

Southern New Hampshire University

Expected Graduation: July 2026
